AKASH SINGH

SOFTWARE ENGINEER (JAVA DEVELOPER)

New Delhi | +91 7317883407 | akashsingh16423@gmail.com | LinkedIn

OBJECTIVE

To obtain a challenging position as a **Software Engineer (Java Developer)** at a top-tier organization where I can leverage my skills in **Java, Spring Boot, Microservices** to design and develop scalable, high-performance applications.

EDUCATION

Bharati Vidyapeeth Deemed University — Paschim Vihar, Delhi
Master of Business Administration — *01/2021 - 12/2023*

Allahabad State University — Allahabad, UP, India
Bachelor of Arts — *07/2017 - 08/2020*

TECHNICAL SKILLS

Programming Languages- Java, Python, JavaScript, DSA
Web Technologies- HTML, CSS, Angular, React (Basic)
Database- MySQL
Framework- Spring Boot, Hibernate, REST APIs, MVC, Exception Handling, OOP
Tools & IDEs- Eclipse, VS Code, Postman, Git, GitHub

WORK EXPERIENCE

SDE (Full Stack Developer)
LinkX Digital, Ahmedabad, India — 12/02/2024 - Present

- Built and maintained **RESTful APIs** using **Spring Boot, Hibernate, and MySQL** to support core business features, making the backend faster and easier to scale.
- Deployed **microservices on AWS** using SQS and Docker, so each service could be updated and scaled independently without affecting others.
- Improved **database query performance** by adding proper indexing and rewriting slow queries, which made data loading noticeably faster for users.
- Created reusable backend modules with **Spring Data JPA and JDBC**, so the team could add new features quickly without rewriting the same logic.
- Wrote **unit and integration tests** using **JUnit and Mockito** to catch bugs early and ensure code worked correctly before going live.
- Managed code using **Git and GitHub** with clear branching strategies for smoother team collaboration and effective code reviews.

Java Developer (Software Engineer)
DHANUKA Laboratories, Gurugram, India — 16/01/2023 - 05/02/2024

- Developed backend features for enterprise applications using **Spring Boot and MySQL**, following MVC architecture to keep the code clean and maintainable.
- Built **RESTful APIs** to connect different internal systems, allowing data to flow smoothly between departments without manual effort.

- Fixed slow **database queries** by adding proper indexes and rewriting SQL, which made the application noticeably faster for end users.

PROJECTS

JobPoster

- Built a job portal using **Spring Boot, Hibernate, and MySQL** with Redis caching to speed up search results and improve the overall user experience.
- Designed **RESTful APIs** for all core features like job posting, searching, and filtering, ensuring fast and reliable CRUD operations.
- Developed dynamic **React components** with real-time job filters and pagination for a smooth user experience.

CERTIFICATION

- **Java Expert** - Ducat IT Training Center
- **Python** - Insta Infotech
- **Data Structures and Algorithms (Grade: A)** - SN HUB Computer Education
